

# Zero Phosphorous Fertilizer (20-0-10)

THIS PRODUCT IS MADE TO GIVE PROFESSIONAL RESULTS

## DIRECTIONS FOR BEST RESULTS

**ONE 50#BAG / 10,000 SQ. FT. OF LAWN**

### ESTABLISHED LAWNS

TURF FOOD can be applied anytime of the year (except when the soil is frozen). Fall and early spring feedings are the most productive. Use slow release and/or organic nitrogen turf food in the late spring and summer. FERTILIZER should be applied to feed the lawn with 4 pounds of nitrogen per 1,000 square feet annually. Memorial Day, Labor Day, and Thanksgiving are good times to feed the lawn.

TURF FOOD should be watered in after applying.

### SPREADER SETTINGS (APPROXIMATE)

<u>SPREADERS</u>	Feeds	10,000 sq. ft. <u>20-25% N</u>
EARTHWAY		16
LESCO		1
CYCLONE		4 ½
SCOTTS DROP		7
SCOTTS BROADCAST		K
PRIZE LAWN SPREADER		6

SPREADING DIRECTIONS (IMPORTANT) Always spread on dry grass, water thoroughly after application, close spreader when filling, turning or stopping.

**NOTE:** The above suggested settings are approximate. Age and condition of spreader and speed of application can cause variations in rates of application.
